

ATX/CA3S

Replaceable sensor head

FOR GAS DETECTOR CO ATX SERIES

The ATX/CA3S sensor modules use the most modern CO measurement technology, namely a professional electrochemical cell. In addition to the circuit for measuring CO, the sensor modules integrate a non-volatile memory where the production parameters, type of gas, calibration concentration, production date, serial number, etc. are recorded.

The detectors also use part of the module's memory to record operating hours and other events such as alarms. The sensor module guarantees a life of 5 years and allows the life of the detectors to be extended from 5 to 15 years by replacing the module twice.

AVAILABLE VERSIONS

Replaceable sensor head

B95-ATX/CA3S
Replacement gas head - CO
