

ATX/CAX

Replaceable sensor head

FOR COMBUSTIBLE GAS DETECTORS ATX SERIES

The ATX/CAL detector head offers a high degree of selectivity to interfering agents and is equipped with a permanent memory in which the production parameters are entered: type of gas, calibration concentration, production date, serial number, etc.

The detector also uses the ATX/CAX module memory to record sensor operating hours. The ATX/CAX sensor head guarantees a life of 5 years and allows the life of the ATX/CAL fuel series detectors to be extended from 5 to 15 years by replacing it 2 times.
