

CA3

Replaceable sensor module

FOR GAS DETECTORS DM03, DM03LE AND WPD CO SERIES

The CA3 and CA3S sensor modules use the most modern CO measurement technology, namely a professional electrochemical cell. In addition to the circuit for measuring CO, the sensor modules integrate a non-volatile memory where the production parameters, type of gas, calibration concentration, production date, serial number, etc. are recorded.

The detectors also use part of the module's memory to record operating hours and other events such as alarms.

The sensor module guarantees a life of 5 years and allows the life of the detectors to be extended from 5 to 15 years by replacing the module twice.

AVAILABLE VERSIONS

Sensor module replacement:

Product code	Description
B95-CA3	Replacement electrochemical cell CO
B95-CA3S	Replacement electrochemical cell CO
